Dear Recruitment Team,

I am excited to continue the coding chapter of my career by leveraging six years as a math professional and a passion for problem solving, mathematics, and logic. Learning to code has been reminiscent of my prior professional learning in mathematics – using logic, breaking down problems, building models is inspiring and empowering. As an experienced teacher, I have honed my communication, leadership, and collaboration skills while working with diverse student and professional communities, which I have found to be incredibly helpful in software development.

I have a deep commitment to equity and inclusion and have dedicated much of my professional life to supporting underserved populations; I look forward to continuing these efforts in future workplaces.

Sincerely,

**Megan Zinka**
